

Peter van Beek, Ph.D.

AI Systems Engineer | Portland, OR | pjlvanbeek@gmail.com | linkedin.com/in/petervanbeek

EXECUTIVE SUMMARY

Senior AI Systems Engineer with 25+ years bridging signals, models, profiling, accelerator silicon specs, and embedded deployment across automotive speech, computer vision, and robotics.

PROFESSIONAL EXPERIENCE

Rivian & VW Group Technologies | Senior Staff AI Engineer (Apr 2025 - Mar 2026)

- Led speech AI model inference optimization for Rivian Voice Assistant (TTS, ASR, noise suppression).
- Quantized models to INT8/FP16 for real-time latency & memory targets on automotive SoC.

Intel Corporation | Senior AI Algorithm Engineer (May 2019 - Nov 2024)

- Developed efficient deep-learning models for semantic segmentation, depth estimation, & super-resolution.
- Authored functional hardware specs for efficient low-precision deep learning accelerators.

Intel & Mobileye | Technical Lead (Apr 2017 - May 2019)

- Led open-source C++ library implementation for Responsibility Sensitive Safety (ad-rss-lib).
- Developed scenario-based safety KPI algorithms & sensor compression solutions.

Sharp Labs of America | Technical Lead Manager & Principal Researcher (1998 - 2016)

- Led computer vision, robotics navigation, 4K/8K/HDR TV vision processing, & MPEG contributions.

EDUCATION

Delft University of Technology - Ph.D. & M.Sc.Eng. in Electrical and Computer Engineering
